PROFESSIONAL SUMMARY

Entry-level Python Developer with strong knowledge of Python, SQL, object-oriented programming, database management, and backend development. Experienced in academic and personal projects involving data processing, REST APIs, and analytics. Seeking an entry-level role to contribute to software development, backend programming, debugging, and database-driven applications.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026
Vignan's Lara Institute of Technology & Science, Guntur

Bachelor of Science in Data Science 2021 – 2024
Jagarlamudi Kuppuswamy Chowdary College, Guntur

TECHNICAL SKILLS

Programming Languages		Python, SQL, Java (Basic)
Python Fundamentals		Object-Oriented Programming, Functions, Modules, Exception Handling, File Handling, Debugging
Libraries		Pandas, NumPy, Matplotlib, Scikit-learn
Backend Development		FastAPI, REST APIs, JSON
Databases		MySQL, PostgreSQL
Developer Tools		Git, GitHub, VS Code, Jupyter Notebook
Core Concepts		Data Structures and Algorithms, DBMS, Data Cleaning, Exploratory Data Analysis

INTERNSHIP

Microsoft Foundations of AI Intern 2025
Edunet Foundation / AICTE

- Completed a six-week internship covering AI, machine learning, deep learning, natural language processing, and responsible AI.
- Gained exposure to AI concepts and model development through project-oriented learning.

PROJECTS

DSA Practice Application *Python, FastAPI, React, PostgreSQL* [LINK]

- Worked on a programming practice platform containing 415 data structures and algorithms problems.
- Worked with FastAPI services and PostgreSQL integration to support database-backed application features.
- Contributed to API communication, feature development, and application debugging.

Political Sentiment Analysis System *Python, NLP, RoBERTa, BiLSTM*

- Developed a sentiment analysis project to classify political opinions using natural language processing.
- Applied text preprocessing and evaluated classification models using accuracy, precision, recall, and F1-score.
- Explyzed explainable AI techniques to interpret model predictions.

Bank Customer Analytics Platform *Python, Pandas, NumPy, SQL* [LINK]

- Built a Python analytics pipeline to process and analyze over 1 million bank transaction records.
- Generated customer summaries and structured CSV and JSON outputs for transaction analysis and reporting.
- Analyzed transaction values, customer activity, and peak transaction hours to identify business patterns.

CERTIFICATIONS

- Python for Data Science – IBM
- CS50 – Harvard University
- Java/Python Programming – Cisco
- Microsoft Foundations of AI Internship – Edunet Foundation / AICTE
